STAINLESS STEEL CARE & MAINTENANCE

To aid the longevity and appearance of this quality Zanda Stainless Steel product, we recommend periodic cleaning with the application of a metal polish such as "Blue Magic".

Atmospheric conditions, salt deposits, caustic agents, cement or dust from construction site, all have the potential to cause discoloration to the surface.

If this occurs, do not be concerned. Discoloration is simply particles clinging to the surface of the Stainless Steel. The product can be revived by following the above maintenance procedure and repeating regularly.

This small amount of routine care can only preserve the elegance of your Zanda Stainless Steel Hardware.
